

YOUR CATALYST FOR GROWTH™

The **RISK-FREE**
SOURCING SOLUTION™

QUALITY . ASSURED

HOW DO WE ENSURE THAT YOUR SOURCING IS RISK-FREE?

Risk-Free means eliminating any concerns or dangers with offshore purchases. This allows you to focus your attention on your most important responsibility... your customers. Risk-Free also means you don't have to pay for your order until it is received at your warehouse and you have inspected it. GCP will handle all of the details from purchase order to product delivery.

From Day-One, GCP's mission has been to "Develop and Maintain Long Term Mutually Beneficial Relationships". Our goal is for the relationship to be Risk-Free for everyone involved in the supply chain starting with you the customer and finishing with the supplier

1 The Opportunity Qualifier™
All opportunities are not equal. We believe it is best to find out upfront if a real incentive exists before proceeding to source your product requirements.

2 The Vital Factors Checklist™
This step helps you identify your essential criteria; from product specs to communication and packaging. This allows GCP to choose The GCP Approved Supplier™ that will meet your market requirements.

3 The Real Savings Formula™
GCP will match your technical and cost requirements to create Strategic Alignment between you, GCP and The GCP Approved Supplier™. This will ensure the best sourcing solution for your needs.

4 The Risk-Free Trial Order™
After approving the product samples, we ask you to place a trial order to confirm acceptable performance. It is Risk-Free because if the product does not perform, you do not pay. If it works, you pay and proceed to full container orders.

5 The Vital Factors Confirmation™
After receiving your container we ask you to confirm the information on The Vital Factors Checklist™. If something is not up to your standards, tell us and GCP's Quality Management Program kicks into high gear, to resolve the issues quickly.
